## language skills

Indonesia (Native)  
English (Good)

## Experience

- Intern Developer at PT. Visionet Data Internasional from Feb 2019 - Feb 2020
- JobDesc : Modify OSSN (Open Source Social Network) using Visual Studio and VScode. and using it for internal Social Media in Visionet. Made an App named We-V (advertise any kind of event for the internal and corporate partners) with React Native for the front-end, and Postgre SQL for the back-end. Docker for the containers in used for Deploy and Publish to App store and Android store.
- ASP.net, MVC (model, visual, controller). Training about 2-3 months how to use C#, dotnet and MVC concept. In the beginning of works, Supervisor give an internal project for each individual for the first project. CRUD website that simulate transaction of movie blu-ray purchasing. Then for the real project, Contribute in Visionet Client Website, making Dashboard that show Chart using MIT license, key performance indicators (KPI) for the progress that been made in Visionet for the every project with client. CRUD Transaction that been made for each job of monitoring field workers for the client. Intergrate it with OSSN and We-V app. I'm using Visual Studio 2019 community edition.
- For OSSN, I'm using Postgre SQL. And for .Net Project with SSMS 2019 student edition.
